Dear Mr. Grow

Re: Identification of Water Right from Bridle Veil Falls

I am responding to your request concerning the clarification of water rights for the Greater Bridle Veil Falls Recreation and Retreat, a Utah Partnership. Exchange 189 which was originally filed in the name of Margaret Clegg, based upon a decreed right from the Provo River (Page 20, paragraph (p) Civil Case #2888 is still in good standing as long as the water has been used within the last 5 contiguous years. This entitles you to 17.4 acre feet of water to be used on a year round basis January 1 through to December 31 at a flow rate of 0.0238 cfs. from a spring located So. 2096.75 ft. and E 240 ft. from W4 Sec. 34, T5S R 3E SLBM. This water is used upon the basis that it's like flow is to be released as heretofore at the point diversion listed at the Lake Bottom Canal Diversion from the Provo River at So. 1944 and E. 511 from N4 Cor. Sec. 25, T6S R2E SLBM. The priority of this right is a first class Provo River Decreed right with uses currently described as being used for domestic, related uses at a lodge, and for irrigation of mountain foliage near the lodge, all uses within the NE4, SE4, Sec. 33, T5S, R3E SLBM.

The water right described above is the basis for the assessments (Account 43-52) that you have received from this office. The right you are entitled to is as described above, not a percentage of the Provo River, but the flow at 0.0238 cfs (10.68 gpm), up to 17.4 acre feet diverted from a spring used at the Retreat.

I hope this information has been helpful. Complimentary copies of the documents pertaining to the water right you concerned about have been included along with your blank check. The water rights and distribution account have been endorsed as per the assignment form you have included to UPSTREAM LTD. c/o Angela Dyan Grow. If you have questions concerning any of the above, feel free to contact me at 538-7431.

Sincerely,

John S. Larsen, WR Spec. III

Showedowt this Water right now be in ANGECA DYAN GERERVEDOND 7. MAR 0 6 1995 Here is a Copy of the application which was approved. We have believed that we have 17.4 acre feet full years use (See Higherson) Is this clearly wrong. or do we have, instead, 24.69 in Para 14. 1.50 = 16.46, or inverse at 6.075. Does this mean we have 6.075% of Provo River? So it correct that this is a Jan 1 - Dec 31 sight as Itsted in para 7, para 14, para 16 ? the Explanatory as "full years use"? Is this the same water right as our "Water User Acct # 43-52 ? We need some help in understanding what our fuel nights are. Your expertise would be most helpfuls 3188 North Cottonwood have Provo, witch 84604-4496 Phone 373-1459
